

*Suggested Changes in Charter to remove
\$1000 Limit*

Section 41. PROCUREMENT. Procurement of materials, equipment and services shall be in accordance with regulations pertaining to state agencies or in accordance with procedures recommended by the Oregon State Department of General Services for local governments.

(This section replaces Section 41. of the present charter. This current section is unworkable in the light of present-day costs and bidding procedures. Your committee believes that the proposed language provides much more detailed protection than any arbitrary bidding limit.)

Section 42 DEBT LIMIT. No debt shall be incurred contrary to municipal budget law or other relevant state law, nor regardless of state law shall General Obligation Bonds be issued without a vote of the people.

(This section replaces Section 42 of the present charter. This current section is unworkable in light of present-day costs. Your committee believes that the proposed language provides a more adequate protection than any specified limit.)
